Private pesticide continuing instructional courses

Abstract

ISU Extension offices offer private pesticide applicator continuing instructional courses (P-CICs) each winter from early December through April 15. See the list for upcoming P-CIC locations and dates for the period between December 15 and January 15. Private applicators may attend in any county, not just their county of residence. Contact your county extension office for times and locations for these meetings. If your county is not listed, P-CICs in that county are scheduled after January 15. Also, there may be additional scheduled dates after January 15 for the counties in the list. Remember that P-CICs **do not qualify** as continuing instructional courses for any commercial categories, or for certified pesticide handlers.
